

RECIPROCATING COMPRESSORS

EGSENL is an approved packager and official distributor of **Ariel** reciprocating compressors, each compression package is intricately and uniquely designed and engineered to the customer's specific operational parameters.

Our experience in gas compressor packages supply, covers solutions ranging from **200 KW** up to **3.6 MW**, both with **electric** motor or **gas** engine driven.

Operation can be manual or fully automated, with local and remote control panels. Utilizing the latest technology from the design phase through to the build, let our applications engineers find the right solution for your compression application.

- **200KW - 3.6MW**
- **Gas engine or electric motor drive**
 - **Manual or fully automated**
 - **Air Cooled Heat Exchanger**
 - **Remote and local control**
- **Skid mounted or self-contained**
- **Sound enclosures as required**
